Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Acknowledgement

1. The preliminary amendment to the claims filed with the original disclosure and original claims on 1/4/2006 by the applicant are acknowledged. The applicant has cancelled claims 1-6 and claims 7-13 are pending. Therefore a first action on the merits of claims 7-13 will be rendered hereinbelow.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “3” has been used to designate both “top part of syringe housing” and “syringe container”. And reference character “12” has been used to designate both “ledge” and “plug”. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show a “trigger” as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to

avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: on page 4 at line 7, the phrase "plug 12" should be replaced by "bung or plug 4". Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3709

6. Claims 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Gabriel et al. (USPN 5,114,406).
7. In regards to claim 7, Gabriel ('406) discloses an injection device (10), needle (16), syringe (20), plunger (18), flexible o-ring (98), syringe container (12), an enlarged head (85), a plug (17), a housing (30 and 32), and an activating bias member (100) designed to move a needle from the protective housing and have a fluid path access to the syringe container to inject a medicament into a patient by the actions of moving a plunger to compress a liquid from the syringe container causing expression of the liquid through the syringe needle.
8. In regards to claim 8, Gabriel ('406) discloses a pressure maintaining bias member (14), plunger head (18') and an o-ring (98).
9. In regards to claims 9 and 11, Gabriel ('406) discloses a return bias member (29).
10. In regards to claims 10, 12, and 13, Gabriel ('406) discloses one or more of the bias members provided within the housing in the form of a coil spring (29 and 95).
